DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30 and 38, drawn to methods of producing bone ex vivo and bone produced ex vivo, classified in class 424, subclass 93.7.
- II. Claims 31-33, drawn to methods of producing bone ex vivo, classified in class 424, subclass 93.21.
- III. Claim 34, drawn to a method of identifying a gene involved in bone formation, classified in class 514, subclass 2.
- IV. Claims 35-37, drawn to methods of indentifying and preparing a modulator of bone formation, classified in class 514, various subclasses dependent upon the modulator tested.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation in that the vector of Group II is not required to practice the method of Group I, and the assays of Groups III and IV require different growth promoters and modulators.

Art Unit: 1651

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for any other Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
